## Announcement Regarding Sample Distribution for Cellulose Nano-fiber Powder Dispersible in Organic Solvent

---

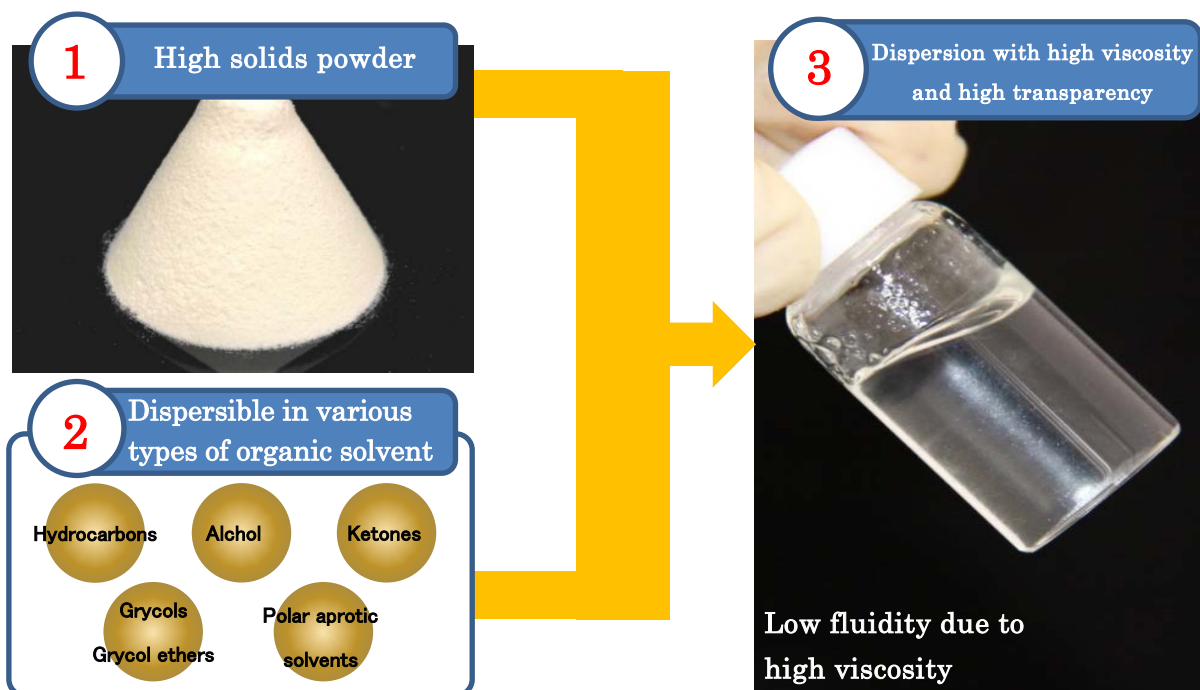

Oji Holdings Corporation (Oji) has succeeded in development of CNF<sup>(\*1)</sup> powder dispersible in various types of organic solvent, and has commenced sample distribution as of June, 2017.

The above development enables us to disperse CNF in various types of organic solvent which conventional CNF has not achieved. Its dispersion has high transparency and high viscosity, and therefore it can be expected to be applied to paints, inks, and polymer synthesis.

From now on, we are trying to accelerate commercialization in a wider range of business fields and create new markets by commencing distribution of these development samples.

(\*1) CNF : abbreviation of Cellulose Nano Fiber
