First Half of FY2014 988,502,394 Firs half of FY2013 987,396,056

- This document is exempt from audit procedures required by Financial Instruments and Exchange Act, and audit procedures for consolidated financial statement haven't been finished as of the date of publication.
- Forecasts released are based on expectations of future economic conditions as of the date of publication. The actual results may differ drastically from these forecasts due to various factors that may arise in the future.

Qualitative Information Concerning Business Performance

Overview of the First Half of FY2014

During the first half of FY2014, economic condition surrounding Oji Group showed a gradual recovery of domestic economy thanks to the improvement of company earnings. However, it ended with lack of dynamism owing to negative impact of rebound from rush demand ahead of consumption tax increase and influence of unsettled weather. From a global view, it remained uncertain in total, because of the economic slowdown in Europe, the deceleration of economic growth in emerging countries, and growing tension in Ukraine and Middle East, although economic condition remained steady in US. Under these circumstances, We have implemented a variety of measures in order to achieve our goal; "Creation of Inovative Values", such as (1)deeping core business by development of high value added products and electric power business, (2)expansion into new business to discover the next core business, and (3)further expansion of overseas business such as pulp business in Oceania and packaging and disposable diaper project in Southeast Asia.

Factors above have led to the results shown below.

Results for the first half (April 1, 2014 - September 30, 2014) were as follows.

Consolidated net sales: $\mbox{$\forall$}$ 637,284 million (0.8% decrease) Consolidated operating income: $\mbox{$\forall$}$ 18,022 million (24.8% decrease) Consolidated ordinary income: $\mbox{$\forall$}$ 14,752 million (48.7% decrese) Consolidated net income: $\mbox{$\forall$}$ 5,737 million (61.0% decrease)

Sales overview is as follows.

OHousehold and Industrial Materials

Domestic sales of containerboards decreased because rebound from rush demand ahead of consumption tax increase and unsettled weather in summertime depressed demand around greengrocery and beverage. However, total sales volume slightly exceeded previous year thanks to the increase of export sales.

Sales volume of corrugated sheets and boxes decreased slightly because of rebound from rush demand ahead of consumption tax increse, although sales of those for foods and beverage performed steady.

As to sales of sanitary papers, toilet rolls remained static, tissue decreased.

In overseas business, sales of containerboards remained steady in Southeast Asia, the main area of our business operation. Sales of corrugated sheets and boxes recorded healthy, thanks to the firm movement surrounding beverage and processed food.

OFunctional Materials

Domestic sales of specialty papers decreased because of withdrawal of a part of operation, despite having good effect by developing new products and customers. On the other hand, export sales increased from previous year thanks to recovered demand for electrical films and expanding sales of specialty papers.

Domestic sales of thermal papers remained steady.

In overseas business, sales of thermal paper increased in Asia and South America, but decreased in North America and Europe.

OForest Resources and Environmental Marketing

In domestic business, sales of pulp increased because we started selling it for rayon manufacturing mainly to foreign countries in the first quarter of FY2014.

In overseas business, sales volume of pulp for paper manufacturing increased, but sales amount decreased due to falling in price. Sales of lumber decreased because of weak demand.

OPrinting and Communications Media

Sales volume of newsprint decreased because circulation was reduced affected by consumption tax increase, although the number of pages was increased thanks to the football world cup.

Sales volume of printing and communication paper decreased due to declining demand.
