## Critical\_Habitat\_Layer

 LIKELY: Likely Critical Habitat Area

POTENTIAL: Potential Critical Habitat Area

World Administrative Boundaries

Critical habitats are any area of the planet with high biodiversity value, including (i) habitat of significant importance to Critically Endangered and/or Endangered species; (ii) habitat of significant importance to endemic and/or restricted-range species; (iii) habitat supporting globally significant concentrations of migratory species and/or congregatory species; (iv) highly threatened and/or unique ecosystems; and/or (v) areas associated with key evolutionary processes.
